

AsterPeak Revenue Operations Command Center

End-to-end Revenue Operations case study spanning SQL, Excel, Power BI, Salesforce governance, process design, and executive recommendations

Business Context & RevOps Challenges

AsterPeak Software

- Fictional U.S. B2B SaaS company
- ~\$15–20M ARR
- ~100 employees
- HubSpot → marketing & early lifecycle management
- Salesforce → sales system of record

Revenue teams: Marketing Ops, SDRs, AEs, Sales Leadership, RevOps, Finance & Legal

CRM Data Quality

Missing/inconsistent ownership, segmentation & routing data

Pipeline & Forecasting

Stale opportunities, overdue close dates & forecast exceptions

Lead Handoff

Routing inconsistencies and unclear ownership across Marketing → Sales

Commercial Governance

Deal Desk approvals were not consistently documented in CRM

Core challenge: AsterPeak needed both better revenue visibility and stronger operational controls — not just another dashboard.

Key Findings — What the Data Revealed

\$2.05M ARR at Risk

53 open opportunities were stale, overdue, or both

34% of total open pipeline ARR

87.5% Routing Compatibility

1,138 leads matched expected routing logic
Exceptions included unassigned, territory, and segment issues

95.7% Forecast Alignment

847 of 885 forecast snapshots aligned
38 exceptions remained

40.7% Deal Desk Evidence Coverage

150 closed opportunities met review criteria
Only 61 had identifiable approval evidence

Key takeaway: Forecast alignment was strong, but pipeline risk, routing exceptions, and Deal Desk evidence gaps created material operational risk.

Pipeline, Forecast & Routing Risk

Open Pipeline ARR by Stage and Health Status

Pipeline Health: 53 flagged opportunities / \$2.05M ARR at risk

Forecast Misalignment Direction

Forecast Reliability: 95.7% aligned / 38 exceptions

Lead Routing Exceptions by Type

Lead Routing: 87.5% compatible / 162 exceptions

Key Takeaway: Pipeline hygiene and routing exceptions represented the primary operational risks, while overall forecast alignment remained strong.

Salesforce Governance Implementation

Validation Rules

5 Items, Sorted by Rule Name

New

RULE NAME	ERROR LOCATION	ERROR MESSAGE	ACTIVE	MODIFIED BY	
Require_Commercial_Terms_At_Proposal	Top of Page	Payment Terms and Billing Schedule are required at Proposal stage and beyond.	✓	Tyler Medders , 10/4/2026, 3:11 PM	▼
Require_Deal_Desk_Approval_For_Late_Stag	Deal Desk Approval Status	Deals requiring Deal Desk approval must be approved before moving to Commit or Closed Won.	✓	Tyler Medders , 10/4/2026, 4:03 PM	▼
Require_Lead_Source_For_Open_Opportunity	Lead Source	Open opportunities must include a lead source.	✓	Tyler Medders , 10/4/2026, 3:07 PM	▼
Require_Net_ARR_For_Open_Opportunity	Net ARR	Open opportunities must include a positive Net ARR value.	✓	Tyler Medders , 10/4/2026, 3:08 PM	▼
Require_Next_Step_For_Open_Opportunity	Next Step	Open opportunities must include a next step.	✓	Tyler Medders , 10/4/2026, 3:00 PM	▼

Key takeaway: Analytics identified the risks; Salesforce governance combined preventative controls with operational monitoring at the point of execution.

Salesforce Governance at the Record Level

Commit Stage

Opportunity reached the gated late-stage point.

Deal Desk Required = True

Commercial review was triggered.

Deal Desk Approval Status = Approved

Required approval is documented before progression.

The screenshot displays a Salesforce Opportunity record for 'Summit Manufacturing Expansion'. At the top, a progress bar shows five stages, all marked with green checkmarks, leading to a final 'Commit' stage. Below this, the 'Details' tab is active, showing a comprehensive list of fields for the opportunity. Key fields include 'Opportunity Owner' (Tyler Medders), 'Account Name' (Summit Manufacturing), 'Close Date' (12/31/2026), 'Amount' (\$75,000.00), 'Probability (%)' (90%), and 'Stage' (Commit). The 'Deal Desk Required' field is set to 'True' with a checkmark, and the 'Deal Desk Approval Status' is 'Approved'. The right sidebar shows related records for Products, Notes & Attachments, Contact Roles, Partners, and Stage History (2).

Field	Value
Opportunity Owner	Tyler Medders
Private	
Opportunity Name	Summit Manufacturing Expansion
Account Name	Summit Manufacturing
Type	
Lead Source	Web
Net ARR	\$75,000.00
Discount %	0.0%
Implementation Discount %	0.0%
Payment Terms	Net 30
Billing Schedule	Annual in Advance
Custom Pricing	
Nonstandard Contract Terms	
Deal Desk Required	True
Deal Desk Approval Status	Approved
Order Number	
Current Generator(s)	
Amount	
Expected Revenue	
Close Date	12/31/2026
Next Step	Schedule discovery call
Stage	Commit
Probability (%)	90%
Primary Campaign Source	
Main Competitor(s)	
Delivery/Installation Status	

Key takeaway: Governance was enforced at the individual opportunity level, not just documented in policy or reporting.

Process & Deal Desk Operating Model

Marketing-to-Sales Handoff

Lead → MQL → SQL → Opportunity → Customer

- Segment + territory routing
- SDR assignment
- 4-business-hour MQL follow-up SLA
- HubSpot early lifecycle → Salesforce after conversion

Pipeline Governance

Discovery → Qualification → Solution Eval →
Proposal → Negotiation / Legal → Commit

- Required opportunity data
- Stage-aligned forecast categories
- Stale / overdue monitoring
- Seller + Sales Leadership remediation

Deal Desk Governance

Trigger → Review → Approval → Salesforce Gate

- >10% discount or \$100K+ ARR
- Nonstandard commercial terms
- RevOps / Sales / Finance / Legal routing
- Approval required before Commit / Closed Won

Supporting governance: Formal process maps and SOPs document ownership, escalation paths, and repeatable execution across all three workflows.

Key takeaway: AsterPeak's RevOps model connected lifecycle management, pipeline discipline, and commercial approvals into one governed operating process.

Executive Recommendations

1. Strengthen CRM Data Governance

Prevent errors where possible; audit exceptions that cannot be prevented.

- Required-field standards
- Ownership, segment & territory governance
- Recurring RevOps data-quality reviews

2. Improve Pipeline Hygiene & Forecast Reliability

Make pipeline review a recurring management process.

- Review stale & overdue opportunities
- Enforce stage / close-date accuracy
- Surface forecast exceptions

3. Formalize Marketing-to-Sales Handoff

Standardize qualification, routing and response expectations.

- MQL criteria
- Segment + territory routing
- 4-business-hour follow-up SLA

4. Enforce Deal Desk Governance

Document commercial exceptions before late-stage progression.

- Configured Deal Desk triggers
- Cross-functional approval routing
- Approval recorded in Salesforce

5. Establish Ongoing RevOps Operating Cadence

Turn one-time cleanup into continuous governance.

- Weekly pipeline review
- Routing / CRM exception monitoring
- Periodic Deal Desk review

Priority: Shift RevOps from reactive reporting and cleanup toward continuous, system-enforced revenue governance.

Business Impact & Project Summary

Business Impact

- Cleaner, more reliable CRM data
- Stronger pipeline hygiene
- More credible forecasting
- More consistent lead handoff and follow-up
- Better Deal Desk approval traceability
- Reduced risk of undocumented commercial exceptions

What This Project Demonstrated

- SQL analysis and reconciliation
- Excel audit workflows
- Power BI executive reporting
- Salesforce configuration and governance
- Lead, pipeline, forecast, and Deal Desk process design
- SOPs, executive recommendations, and business communication

Project outcome: Built an end-to-end Revenue Operations operating model that connected analysis, reporting, CRM governance, and repeatable business processes.

Note: AsterPeak Software and all underlying data are synthetic; business impact reflects expected operational value rather than realized production outcomes.
